colour range | 2016-17

Embassyliving products are available in a wide range of exciting colours. From brights to more neutral colours there is a colour to suit any setting. The plastic ranges are UV resistant and recyclable polyethylene. Wire products come with a protective zinc finish, making them suitable for outdoor situations, and can also be powder-coated in a rippled finish. Table tops are made of compact laminate which features a black core visible around the edge, and a choice of colours for the surface of the table top.
